

Materials and Linings

Materials

Our quality basketware is produced from a variety of materials, willow being the main one but we can also use:

Sea Grass

Green Ash

Wood

Weatherproof Resin

They are all woven by hand

in a time consuming process

with great skill and quality. We

will be adding new and different

materials to our large range all

the time.

All measurements in the brochure are length x width x height with handle height (where applicable).

Measurements are the top external size and are in millimetres.

Linings

There are many options for linings that are used for all sorts of reasons. They can make the baskets more practical or decorative depending on the situation the baskets are being used in. The linings in our baskets are either sewn in to the basket or they are just tied in, which makes them removable and can be re-attached.

Tradition and Innovation
